Matriculants, welcome to the University!

Educational establishment
“Mogilev State University of Food
Technologies”

Mogilev State University of Food Technologies, is the only higher educational establishment in the Republic of Belarus which trains specialists for food processing and, chemical industries.

The University enrolls foreign citizens from 13 countries of the near and far abroad.

he University provides training in 14 Undergraduate majors, 10 Master's degree programs, 12 Postgraduate degree programs and 2 Doctoral degree programs.

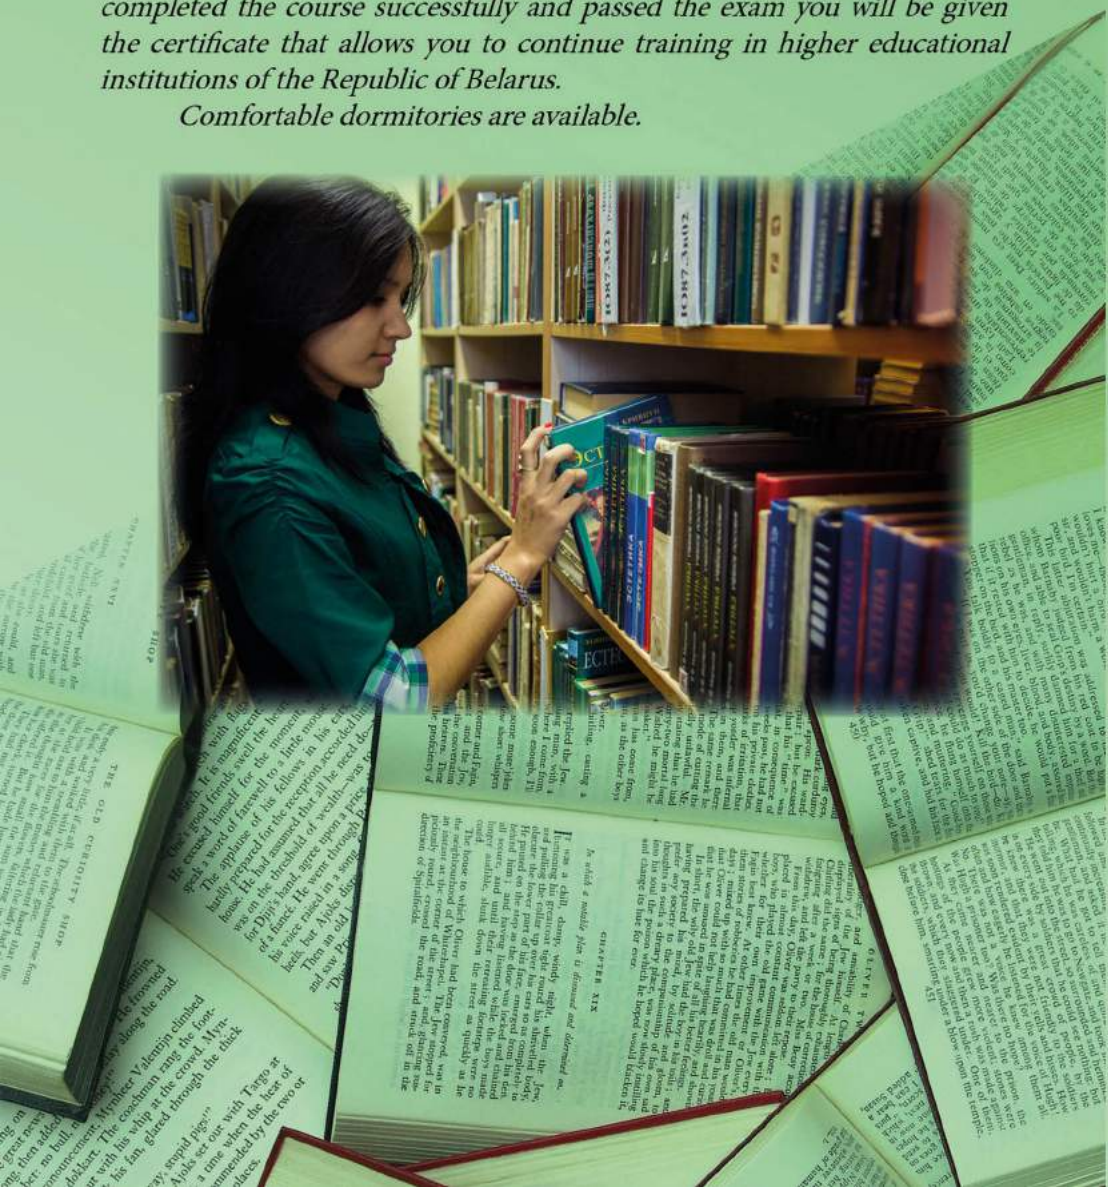

The University has good infrastructure: two comfortable dormitories, located near the educational buildings, modern library, canteen, medical center, sports complex.

The Russian language course is a quality language training from high qualified professionals. Training at any level of complexity - from «starter» to «advanced» is available in group of 10 people.

Students have the opportunity to study in groups or take courses individually. The groups are formed according to the foreign citizens level of knowledge of the Russian language. The group classes begin as groups (6-10 people) are formed. Upon completion of training, students take exams that determine the degree of knowledge of the Russian language. When completed the course successfully and passed the exam you will be given the certificate that allows you to continue training in higher educational institutions of the Republic of Belarus.

Comfortable dormitories are available.

SPECIALITIES OF THE FIRST LEVEL HIGHER EDUCATION

- Machines and apparatuses of food production*
- Low temperature engineering*
- Automation of technological processes and manufactures (chemical industry, food industry)*
- Information system and technologies(food industry)*
- Technology of storage and processing of edible vegetable raw materials*
- Technology of storage and processing of animal raw materials*
- Food production and catering*
- Chemical technology of organic substances, materials and products*
- Environmental activity*
- Accounting, analysis and auditing*
- Finance and credit*
- Commodity studies and product expertise*
- Economics and organization of production (public catering, food industry)*
- Management of innovative projects of industrial enterprises*

Full-time training course for all specialities - 4 years.

SPECIALITIES OF THE SECOND LEVEL HIGHER EDUCATION

Commodity studies and product expertise

Business engineering

Machines, units and processes

Thermal power generation and heat engineering

Automation

Manufacture and processing of polymers and composites

Production of food products from animal raw materials

Production and catering

Production of food products from vegetable raw materials

Chemistry

Full-time training course for all specialities - 1 year
Correspondence form of education - 1,5 year

Term of study:

The correspondence form of higher education is available in groups of 8-10 people trained on an individual schedule with a visit once a year. Duration of study: 5 years.
